

AR 15 Mag Charger

Simply put, the Caldwell AR Mag Charger revolutionizes the way ammo is handled and loaded into AR-15 magazines. It is designed to accept 50 loaded rounds directly from any common 50 round ammo manufacturer box or from aftermarket 50 round plastic storage boxes. Simply align bullet tips and dump a box of ammo into the Mag Charger. The ammo is automatically aligned without touching a single round. Once filled with ammo, insert any AR magazine into the Mag Charger just as you would into a rifle. Then actuate the plunger back and forth loading 5 rounds per stroke as the spring loaded ammo carrier automatically advances aligning the next five rounds until magazine is fully loaded. **The entire process of filling the Mag Charger with ammo and loading all 50 rounds into two magazines takes less than 15 seconds!** An Ammo Transfer Tray is included to invert ammo that is positioned in boxes with the bullet tips oriented down or to stage bulk ammo for dumping into Mag Charger. Highly durable Polycarbonate construction, compatible with .223, 5.56 and .204 ammo. Patent Pending.

- Load AR magazines in just seconds
- Accepts 50 rounds of .223, 5.56 or .204 loaded ammo
- Instant transfer system from ammo box directly to Mag Charger
- Loads 5 rounds per "stroke" with auto advance

- Compatible with all AR platform mags both mil spec and molded plastic
- Durable Polycarbonate construction

Three easy steps:

1. Dump 50 rounds of ammo

2. Insert any size magazine

Rapidly operate plunger, loading 5 rounds per stroke
