

Briley Custom Glock Slides

These quality slides are manufactured from pre heat treated 4140 carbon steel. The slides can be used on all generations of Glock firearms and should accept factory standard parts. Additionally both the breech face and striker hole have been wire EDM'ed for optimum finish and accuracy. They have both rear and front serrations with the top of the slide also being serrated. They are currently available in the following configurations; Model 17 9mm Model 17 9mm Flat Face (For Compensators) Model 22 40 S&W
