

Kimber Pepper Blaster (Non-Lethal)

Faster

PBII's super hot, super effective one-two punch stops threats at a distance like nothing else can, disabling an attacker for up to 45 minutes. Our team in Switzerland engineered this totally new personal safety device to be three times as effective as the most popular spray, because it's not a spray.

Easier

PBII's ergonomic grip provides a perfect grip for almost any size hand. Our game-changing design is disposable and economical. The pepper solution itself is the most powerfully concentrated version on the market. Because it's not pressurized like an aerosol spray, there's no way it can lose pressure over time.

13ft @ **90**mph

Safer

PBII eliminates the well-known shortcomings of old-school aerosol pepper sprays. It has a three-year shelf life, longer than any aerosol product. Two highly concentrated pepper solution charges give you a second shot. But a single hit to the face will disable an attacker for 45 minutes or more.
