

## Leupold DeltaPoint Reflex Sight Matte 7.5 MOA Dot Product Info

The **Leupold DeltaPoint Reflex Sight Matte 7.5 MOA Dot** ushers in the next generation of **illuminated reflex sights** with progressive technology that speeds target acquisition and keeps shooters of all skill levels focused and right on the mark. The **DeltaPoint Reflex Sight** by **Leupold** can be used with nearly any firearm, from handguns to shotguns to AR-style rifles. The **Reflex Sight** 's applications range from plinking to hunting to competitive shooting, as well as home defense, law enforcement and military. The **Leupold DeltaPoint Reflex Sight** 's compact size allows mounting of the sight in conjunction with a primary riflescope for use when adjusting fire from distant to short-range targets, or dealing with changing environments in a single tactical encounter. **Leupold DeltaPoint Reflex Sights Matte 7.5MOA** come in a kit which includes numerous mounting options, saving the additional expense of purchasing separate mounts that may cost hundreds of dollars more. A special plate system aligns the mount with the gun, ensuring a good fit. Each kit has plates for 10 of the most popular handgun applications, with compatibility for up to 40 different handgun models. There is also a cross-slot mount for easy coupling with Picatinny Weaver-style rails and bases. Key features that make **Leupold Delta Point Reflex Sight** a truly unique high-performance shooting optic include an innovative **aspheric lens, motion activation, auto-brightness sensor,**

**locking elevation and windage adjustment system**, and an ultralight rugged **magnesium housing**. Exclusive to this **Leupold Reflex Sight** are two screws that lock in windage and elevation adjustments, preventing the reticle from wandering under heavy recoil or extended shooting periods. A generous 120-MOA of adjustment range for both windage and elevation makes zero easy to change and maintain, allowing the shooter to dial in the target with precise accuracy. Adjustment markings are ¼-inch MOA with an adjustment tool included with the sight.

With these features of the **Leupold DeltaPoint Reflex Sight Matte 7.5 MOA Dot**, Leupold has launched a next-generation optic that is extremely versatile, intuitive and rugged, while providing the ease and precise accuracy of a red dot sight.

The **Leupold DeltaPoint Reflex Sight Matte 7.5 MOA Dot** is available in the following models:

- 65930: Leupold DeltaPoint Reflex Sight Matte 7.5 MOA Dot for All Mounts

**Color:** Matte  
**Battery:** 1 x CR2032 (included)  
**Reticle:** 7.5 MOA Dot

## Features of Leupold Delta Point Reflex Sight Matte 7.5 MOA Dot:

- Aspheric lens is set in a wide housing, increasing the usable field of view by up to 56 percent (depending on firearm) as compared to other reflex sights.
- With edge-blackened treatments, the lens produces an exceptionally bright, sharp and clear image across the visual field.
- Optics treated with DiamondCoat for high resistance to abrasion and scratches.
- Proprietary motion sensor detects even the slightest movement and instantly activates the illumination, ensuring that DeltaPoint is ready when the time comes for quick action.
- Auto-brightness sensor continuously samples lighting conditions and adjusts to changes, providing optimal reticle intensity that allows the shooter to quickly place the reticle on the target.

- Auto-off feature shuts down the reticle after an inactive period, that delivers up to twice the battery life of other reflex sights.
- Lens housing is made from lightweight magnesium tested to withstand up to 3,500 Gs of impact.
- DeltaPoint is waterproof and shock proof, and covered by the Leupold Full Lifetime Guarantee.
- The 7.5 MOA reticle is ideal for identifying and zeroing in on close-range targets. Bold and easy to find for fast target acquisition.
- Low-profile design that keeps the sight on target, yet unobtrusive to the shooter.
- Precision locating pins allow easy removal and installation of the mounting brackets while maintaining point of impact.
