

# Leupold VX-2 Riflescopes

The VX®-2 is one of our most popular lines of riflescopes, for reasons that become clear to anyone who picks one up. It's packed full of useful features, including precise ¼-MOA finger click adjustments; the Quantum Optical System with Index Matched™ lens coatings for exceptional image brightness and clarity; externally threaded fast-focus eyepiece; tactile power indicator; and for the first time, the option of our Custom Dial System™ in select models. The VX®-2 is built to meet the demands of today's serious hunters and shooters.

## Quantum Optical System

Leupold mechanical and optical scientists, mechanical engineers and product line managers. have dedicated their design efforts over the last year to developing the optical system for Leupold's newest generation of riflescopes, including the VX-1...

## Index Matched Lens System

A Leupold® exclusive, this system has nearly perfected Leupold's already impeccable light management. Leupold engineers specify different coating materials for each lens surface in the riflescope, based on the lens' index of refraction, placement and...

## DiamondCoat

This coating on the exterior lenses gives you the ultimate in abrasion resistance and light transmission. The result is a flawless sight picture over a lifetime of hard use. DiamondCoat™ has made a difference in battle; now it can make a difference where...

## 2nd Generation Argon/Krypton Waterproofing

While we still waterproof other optics with bone-dry nitrogen – technology pioneered by Leupold® – Select models feature our exclusive, proprietary Argon/Krypton gas blend. Its advantages are two fold: it nearly eliminates the effects of thermal shock, and the...

## Lead Free

Leupold optics offer better optical clarity as a result of lead-free glass lenses. In addition to its superior optics, the lenses are produced with none of the environmentally damaging by-products common to standard glass production. A small step, but one in...

## Generous Eyebow

The generous eyebow makes it faster and easier to get your eye behind the riflescope and achieve a full, clear sight picture. Setting up for longer shots you'll appreciate the flexibility it affords, and in close up big game or dangerous game situations the quick...

## Blackened Lens Edges

Blackened lens edges reduce unwanted glare and diffusion through the lens edges to provide better resolution, improved contrast and superior optical performance.

## Externally Threaded Fast-Focus Eyepiece

The sleek design of the externally threaded fast-focus eyepiece provides for faster focusing of the reticle under any conditions.

## 3:1 Zoom Ratio

## CDS (Custom Dial System)

Leupold CDS™ models allow you to quickly dial your elevation to different sight-in ranges with a custom adjustment matched to your specific ballistics information. The CDS dials change out easily, allowing you flexibility with different loads, conditions...

## BAS (Ballistic Aiming System)

Leupold's® Ballistics Aiming System™ is comprised of five specialized reticles – Boone and Crockett® Big Game, Varmint Hunter's, LR Duplex, LRV Duplex, and the new SA.B.R. reticles – which take into account the variables crucial to accurate...

1/4 MOA Target

1/4 MOA Finger Click

Finger click adjustments for windage and elevation (1/4-MOA) offer absolute repeatability and dependability over a lifetime of extreme use (metric adjustments – 1 cm per click).

## Durable Lens Cover

Keep the lenses of your Leupold® riflescope looking like new. Protect it from dirt and damage with the durable bikini style lens cover included with your riflescope. Protects your scope while in storage or in the field.

## Factory Standard Reticles

Leupold offers more factory standard reticles than any other scope manufacture. Our line of hunting scopes feature over 20 different popular reticle configurations including Leupold's own line of Ballistics Aiming System reticles. If that weren't enough, most...
