

South Georgia Guided Hog Hunts

Local farmers benefit from the removal of wild hogs that terrorize GA Farms. Hunters are guided with experienced night hunters who will be by your side from beginning to end, ensuring a safe exciting hunt. Farmers, get the most efficient method of varmint and hog control possible. The hunters get the hunt of a lifetime with close encounters with large numbers of wild hogs.

THERMAL optics are used to locate the hogs and varmints; AR-15 rifles with thermal optic scopes are used to harvest the hogs in the black of night. The Hunts are performed year round. It is a full time job. A typical night includes several encounters at VERY close range with groups of hogs as close as 40 Yards.

Groups of Six may be accommodated!
